

Trumbull Introduces Vendor Management Tool, sourc-it vmsm

Columbia, SC – August 31, 2007 – Trumbull Services, LLC, a leading provider of insurance solutions to the property and casualty insurance industry announced the introduction of their latest product innovation, sourc-it vmsm. The notice was given in conjunction with another significant event, the implementation of their newest client, a mid-size regional carrier.

sourc-it vmsm is a revolutionary new automation tool that offers companies the opportunity to change the way that they have been managing their subrogation files, improve productivity and eliminate the manual tasks associated with managing a vendor network for subrogatable losses, including first and second file placements, arbitration and litigation files.

The automated assignment and tracking tool provides clients with the ability to monitor all members of the network on a regular basis. Vendors are reviewed and evaluated monthly according to collection results and adherence to pre-defined service level agreements. Agreements include the following performance measures: collection percentage, cycle time, accurate and timely payment, settlement percentage, and reporting. An inventory scorecard provides an update of all outstanding files.

"sourc-it vmsm is a work saving product that allows companies, in the Business Process Outsourcing (BPO) environment, to eliminate the manual tasks associated with vendor file assignment and oversight," states Betsy Enloe, Chief Operating Officer of Trumbull. "Our versatile tool lets both our new and existing BPO clients take advantage of Trumbull's pre-established national network of vendors, each of whom has built a strong reputation for success in the market."

Trumbull Services, LLC, is a Windsor, Connecticut based company providing business process outsourcing (BPO) and application service provider (ASP) solutions to the insurance industry. Insurance services and technology applications include policy administration, subrogation recovery, and premium billing.
